

IN THE CLAIMS:

Please amend the claims as follows. Note that the full text and/or status of all claims (including those not being amended within this paper) may also be included to provide the convenience of a complete set of claims for easy review.

B¹

27. (Amended) A process according to Claim 24, which further comprises a step of forming a wiring layer for actuating the electrode on the substrate, and a step of forming an electro-conductive path for giving an electrical connection between the wiring layer and the electrode through the light reflector layer.
